

REVOLVER

By Leon Ransmeier

HAY

HAY's Revolver Stool is positioned on a bearing mechanism that enables the seat and foot ring to rotate 360 degrees. The slim, slightly dished seat features curved edges for additional comfort, while the footrest provides support and the weighty base creates total stability. The rotating feature, while altering appearance, also lends a sense of the play to this functional design. Available in two heights and a choice of coatings, its versatile presence makes it suitable for a wide range of public and residential environments.
